

**Minutes of Discussion Regarding Nicotine and Metabolite Analyses (PM-8451)**  
**August 27, 2004**  
**Page 1 of 1**

**Participants**

**Philip Morris**

Shixia Feng

**Covance**

Mark Bentley

Mike Greenwood

Jill Schultz

The following items were discussed:

**TES Nicotine Analyses**

Harrogate is on schedule and will provide data to Philip Morris on 08/31.

There are 9 subjects with free values greater than total. Following the meeting Shixia Feng confirmed that these data would be included in the data set but highlighted. A possible explanation or hypothesis for these anomalous results will also be included. No additional analysis work will be needed.

**Audit Report**

A call will be held on 09/01 with Philip Morris and Harrogate to discuss the responses to the audit report. ACTION: J. Schultz to provide dial-in information for the call (done).

**4-ABP Data from EHCJLI/02/02 (28123)**

MDS asked about the source of the information that was included in the spreadsheet from Harrogate with the results. This information is needed in order to link the results from Harrogate with subject/timepoint data from MDS. Mark Bentley will follow up internally with the appropriate group.
